Lucas Marcel Silva de Brito

A Brazilian web developer who loves Next.js.

Resume

I've 19 years old, live in Brazil (Macau - RN), and finished computing technical high school in IFRN - MC in 2022. In this period, I dedicated myself to web development with technologies like React.js, Next.js, and Node.js. After finishing the Ignite course of the Rocketseat, also I got a full scholarship in Do While 2021.

At the moment, I prefer the Front-end, but I know a bit of everything I need to complete my projects by myself (including the Back-end development process). My favorite framework is Next.js. Some of his features, mainly the page rendering approaches, allow a better user experience that suits a variety of use cases. Furthermore, using serverless functions, I can deploy the ecosystem of my small projects in a practical and fast way without the necessity of breaking apart the Front-end of the Back-end.

Four years ago (in 2018), I had my first experience with programming. Python was incredible, but I love it much more the JavaScript. And today I'm still willing to expand my skills and learn new things as before.

Some competencies

- I know and have used agile methodologies;
- I've experienced a variety of deployment options;
- I understand the database's entity relations;
- I develop responsively;
- I try to try new things;
- I can find and resolve errors myself.

Soft skills

- Fast reasoning;
- Dedication;
- Constant learning;
- Objectivity;
- Flexibility.

Courses and certificates

- Do While 2021 – Rocketseat – Jan. 2022
- Ignite: React.js – Rocketseat – Dec. 2021
- IoT – Cisco Network Academy – Dec. 2020
- Omnistack Week 11 – Rocketseat – Mar. 2020
